Experience

SOFTWARE ENGINEER INTERN | BinaryMind Technologies **14 September 2026 – 14 October 2026**

- Gained exposure to software engineering workflows and project development in a professional team environment. Worked with web application technologies as part of internship, contributing to UI improvements and application development.

Projects

DUBAI FABRICS — E-Commerce Website - Client Project

- Developed and deployed a full-stack e-commerce website for a local fabric business, featuring product categories, product details, search/filtering, shopping cart, and favourites.
- Implemented customer account features, order management, and an admin panel for managing products, categories, and website information.
- Integrated Supabase for database and backend services and Brevo for email delivery.
- Deployed the website using Vercel and managed project code through GitHub.

DENTAL PAY – Team Project (Real Client) Jul 2026 – Present

- Developed a dental clinic payment and installment management system using MERN stack (MongoDB, Express.js, React, Node.js) based on real client requirements.
- Developed RESTful APIs for installment plans, payment collection, patient status updates, revenue tracking, and overdue payment management. Also implemented automated patient clearance and a React dashboard for payment summaries, patient history, revenue insights, and overdue alerts.

MY AUTH MANAGER – Personal Project Dec 2025

- Developed a desktop authentication and account management system using Python, MySQL, and Tkinter with login, signup, update, deletion, and logout functionality.
- Implemented SQL queries, triggers, and stored procedures to manage user accounts and login records.

TEA-REX – Personal Project

- Developed a Python-based voice assistant using speech recognition and text-to-speech to automate everyday tasks through voice commands.
- Integrated web search, email, weather/news updates, alarms, reminders, music control, and task management.

UPWORK SCRAPER PRO – Personal Project

- Developed an automated Python web scraper using Selenium and BeautifulSoup to collect Upwork job listings and extract relevant job details and processed and stored the collected data in CSV format using Pandas for further analysis.

Education

Bachelor's of Computer Science (BSCS)- COMSATS University Islamabad, Lahore Campus — CGPA: 3.56/4 |2024-Present
Intermediate (FSC Pre Medical) — 1020/1100|2021-2023
Matriculation (Science Group) -Punjab Groups of Colleges — 1098/1100|2019-2021

Certifications

Data Analyst certificate - Issued by Alex Freberg
Completed practical training in excel, SQL ,Python, Tableau, and Power BI.
